The present EPA ,plan that has been in the making since 2000, for the cleanup of 10 miles of the Lower Willamette river is woefully inadequate considering the amount of pollution that has accumulated over the past century or more. I believe the residents of Portland and and citizens of Oregon deserve a more thorough cleanup so that the contamination including heavy metals, dioxins and pcb's are removed. The plan by the EPA calling for a monitored natural recovery on the Willamette river is not going to work.
